#HereForTheNights 🍪

Insight: Freshman year is exciting but can feel isolating—especially at night. Dorm rooms are unfamiliar, routines aren't set, and loneliness creeps in when the lights go out. Insomnia Cookies understands that feeling better than anyone: we've always been there for late-night cravings, study sessions, and comfort when it's needed most.

Idea: The experience starts with warm, fresh-baked cookies that bring instant comfort. Inside, freshmen discover a soft Insomnia Moon plush, a luxurious silk pajama set, a soothing under-eye mask, and "Open When..." cards filled with uplifting notes and cookie coupons for homesick or stressful nights. A QR code unlocks a curated Study & Chill playlist, perfect for late-night vibes. And just when they think it's over, the empty box transforms with LED string lights into a glowing night light, a delightful surprise that turns their dorm into a cozy haven. They savor the cookies, lean on the plush, mask, and cards for comfort, keep the night light glowing, and share their setup online—making Insomnia not just a midnight snack, but a trusted late-night companion all through college.

#HereForTheNights 🍪

Goal: Our goal with “Night Mode ON” is to motivate college students, primarily college freshmen, to come to Insomnia cookies and establish a sense of trust and loyalty throughout their college years. We want to elicit emotions of delight, comfort, excitement, and belonging. By providing students with a few things they may need to get through those first few nights at their new home away from home, we hope to bring a sense of comfort and trust that lets students know that we got them.

Functionally, we want students to keep purchasing and visiting Insomnia cookies longterm and shortterm, to share their unboxing experience.
